

A Powerhouse for Software Development and Technology Services

- INVENT, ALWAYS -

www.fidenz.com

Introducing Fidenz Technologies

We are an innovative [software development and information technology](#) services company, providing cutting edge solutions. Our journey [began in the year 2010](#), in the heart of Sri Lanka with a handful of IT professionals, banded together to make a difference in the software technology industry.

We provide a quality service, ensuring customer satisfaction, and promoting innovative software and technology solutions. Today we have a [team of over 40](#) and we have been satisfying customers with our services all over the world, from [North America, Europe, Asia and Australia](#).

The unique value proposition for our clients is the [customized software and technology solutions](#) we provide [considering the size, budgets and the complexity of the project](#). We believe in our clients' growth to propel us into our own.

Our Vision

- To become a leading innovative software development services company serving the international market.

Our Mission

- To serve our clients with superior technology, highest quality of service and outstanding care.
- To help our clients grow, so we could grow along with them.
